WORK EXPERIENCE

UPWORKS, Freelance   **Toronto, CA**
Front End Developer   *Nov 2022–Mar 2023*

- Developed responsive HTML/CSS templates from Figma designs, successfully converting visual concepts into functional web interfaces.
- Collaborated closely with a small team of software engineers, contributing to the creation of public-facing data visualizations and dashboards in the Smart City/Open Data space.
- Utilized strong Angular JS skills to integrate dynamic functionality, leveraging the company's library of components for accelerated UI development.

TESSER INSIGHTS   **Chennai, IN**
Web Designer   *Dec 2021–Sep 2022*

- Led the end-to-end design and development process of the company's website using the WIX platform, implementing SEO best practices to enhance online visibility.
- Developed a user-friendly site navigation structure, effectively guiding and funnelling traffic through engaging content for improved user experience.
- Implemented an efficient content management system, resulting in a 100% increase in productivity and streamlined website maintenance processes.
- Actively participated in user testing activities for the Tesser Insights Data Analytics platform, providing valuable feedback to enhance its usability and performance.

ASMARA INTERNATIONAL LIMITED   **Chennai, IN**
Web Developer   *Dec 2020–Nov 2021*

- Demonstrated a proficient understanding of front-end development, encompassing UX design and scripting, making valuable contributions to the team's initiatives.
- Successfully completed projects such as supplier portal designing and the creation of a QR code-based page using AngularJS, revealing a strong aptitude for creativity and problem-solving in a professional setting.
- Designed and developed reports for invoices using SQL Server Reporting Services (SSRS), ensuring accurate and timely delivery of financial information.
- Utilized SQL queries and data manipulation techniques to extract relevant data from databases, perform data transformations, and generate meaningful insights in the reports.
- Extracted and transformed data from various sources, including databases and APIs, to create robust and dynamic dashboards in Power BI.

PROJECTS

Gif from Patterns | JavaScript
Interactive, customizable, and user-friendly animated gif creating web application with colors filled on patterns.
Tangram Man | HTML/CSS/ANIMATIONS
Created web page showcasing a basic colour tangram with buttons to change poses of man. Key-frames animations were implemented.
Landscape Firm Database design | Database Design, SQL
Proposed and built a database including tables for clients, projects, employees, tasks and materials. It enables efficient management of information. Views, stored procedures, triggers enhance data access, automate tasks and maintain data integrity.
Dynamic Website with Crud Operations| Node.js, Express.js, Pug & Mongo DB
Developed the website featuring CRUD functionality for menu links. Used backend framework, templating engine & database.

EDUCATION

HUMBER COLLEGE   **Toronto, CA**
Ontario Graduate Certificate (Web Development), GPA: 85.7   *Jan 2023 – Dec 2023*

ANNA UNIVERSITY   **Chennai, IN**
Bachelors of Architectural Engineering, GPA: 8.3   *Jun 2015 – Apr 2020*
